The Carson **DR-200 DigitalReader** transforms your television into a low vision aid with a magnification of 7.5x on a 21" television monitor. The size of your television monitor determines the actual magnification of the item. The larger the screen, the greater the magnification becomes! Simply connect the DigitalReader to the video input of your television using the supplied video cable, press the power button on top of the unit and place the item directly on top of your reading material. The object you are viewing will appear on your television screen in full color. Internal LED illumination ensures that the image on screen is bright and easy to read. Comfortable to hold and easy to use, the DigitalReader comes with an extra long video cable and power cord so you can sit at a comfortable distance away from your TV as you read. Power is supplied using three AAA batteries or with the included A/C power adapter. The DigitalReader allows those with impaired vision an affordable way to read small print and maintain their independent lifestyle.

Perfect for reading books, newspapers, magazines, telephone directories, bills or any other small print. A simple and affordable way to overcome the limitations of impaired vision.
